

**Remarks**

Claims 55- 70 have been added to define more clearly additional aspects of the invention. New claims 55-70 clearly and distinctly claim aspects of the present invention that are non-obvious in view of the claims of commonly owned U.S. Patent No. 6,117,165 ("165 patent") to Becker. New claims 55- 70 find support in the text of the specification, the original claims, and the drawings.

Applicant respectfully requests entry of this supplemental amendment and response and allowance of all pending claims.

The Commissioner is hereby authorized to charge any required fee in connection with this paper to Deposit Account No. 23-1703.
